IGISG

I GROW IN SUPPORTING GOOD

IGISG TOKEN WHITE PAPER

Contents

1. Introduction

In a world where conflict and challenges compel the good people to engage, while being driven by social media and online communities, the power of inspired individuals and movements has become undeniable. These special people and movements touch our hearts with their valuable concerns, ignite our passion and inspire us to become active. It is up to us to support the good and help it to succeed. We believe that through the enthusiasm and dedication of the good people to the causes of the inspired individuals and movements, we can make a positive impact and make the world a little bit better.

What we need is an initiative and a broad commitment to good. This initiative is IGISG (I Grow In Supporting Good). The IGISG initiative provides various crypto token so that we, and all coin holders, can celebrate, promote and support the good causes of the incredible people and movements that inspire us.

2. The vision

More than a memecoin, IGISG is a movement for good causes to triumph. According to the wishes of the IGISG community, crypto token are provided for different people or movements. The tokens are powerful tools for promoting change. Our vision is to provide a platform where IGISG members can show their unwavering support for the people and causes they love, while making a meaningful impact on the world. Through crypto token, we want to create a community of passionate supporters for the diverse, inspiring personalities and movements that work for good.

3. Good people for a better world

In today's world there are many regional, national and global challenges. Some of the biggest challenges are declining values, climate change, social injustice, political instability, terrorism and natural disaster-related crises. It is important that we face up to these challenges and solve them so that we can create a better future for all of us.

It takes inspired people with bespoke goals to drive good forward. We need activists, political leaders, academics, movements and entrepreneurs committed to making change happen. Equally, however, these protagonists also need supporters and it is therefore important to recognize that we can all play a central role in tackling these challenges. It is our responsibility to commit ourselves to addressing the challenges and helping the good to triumph.

The good causes are diverse and each of us enjoys our work the most when we are particularly committed to the goals that are most important to us. The various IGISG tokens enable exactly this: Support for the good and valuable causes that are most important to you. There are many reasons why we want and should engage in various causes and movements. By broadening our engagement and championing multiple causes of different IGISG tokens, each promotes the different causes and goals according to their own choices. We can reach more inspired personalities and movements and thus have a greater positive impact on the world. This also demonstrates our commitment to a better future for all and not just for a specific group. Ultimately, we should commit to the very initiatives that align with our values and beliefs to bring about meaningful change.

As a community, we must work together and unite to address today's challenges. We must do our part and work for a better world. Let's support the good so that we can create a world in which everyone enjoys living.

The IGISG initiative supports the good causes of the inspired individuals and movements by providing their own IGISG tokens and the associated IGISG communities. IGISG tokens are only provided based on interest from IGISG members. The people and movements supported often have the following impact through their good work:

1. Political figures and movements
2. Environmentally related people and movements
3. Social Persons and Movements
4. Disaster related people and movements

4. The tokens for good goals

The true power of IGISG tokens lies in creating positive change. IGISG stands for "I Grow In Supporting Good" and expresses the willingness of the community members and holders of IGISG tokens to support the good even more on the one hand and to grow personally in the process on the other. Each member of the IGISG community connects to the IGISG community on at least one of the different IGISG platforms and owns at least one of the IGISG tokens.

The IGISG tokens have the following benefits:

- **Statement**: By owning IGISG tokens, the holders are making a statement about the positive causes that the person or movement supported by the respective token stands for.

- **Sponsor**: If the holder makes a profit from trading IGISG tokens, they commit to using a portion of those profits to fund the good causes represented by that token. In case the holder makes losses trading IGISG tokens, no promotion is required. The endorsement is then made by the person who made profits. This applies to all holders of IGISG tokens, including founders, early supporters, community builders and other supporters. Holders can also donate IGISG tokens directly to individual causes of funded individuals or causes. In doing so, they actively participate in funding and promoting the good causes in which they believe.

- **Support**: Each IGISG member makes a personal commitment to support the positive causes of the people and movements funded with the token. The owner can support the people or movements as a whole or individual concerns that are of particular importance or value to him. At the same time, the owners communicate their active support or promotion of the cause, especially in the communities and social media, and thereby motivate others to take action, "do good and talk about it".

- **Assess**: The value of each IGISG token indicates the community's interest and strength in the causes of the person or movement. A higher value of an IGISG token is an indicator of greater support for that person's or movement's cause.

It is the responsibility of the IGISG members themselves to ensure that the support by the IGISG members is actually implemented. Since the entire IGISG initiative aims to promote good, we also trust that all holders of the IGISG tokens act independently.

5. Tokenomics

Token Name: I Grow In Supporting Good (IGISG). All IGISG Initiative crypto token contain the IGISG in their name. In addition, the individual personality or movement for which this crypto token stands is named in the token name. The individual names and further information on each IGISG token can be viewed at https://www.igisg.com.

Token Type: BEP-20

Total supply: 1,000,000,000

Decimal places: 8

Token Availability:

Founders: 5%

Early backers and community builders : 30%

Other supporters: 45%

Marketing: 20%

6. Community and governance

Community Engagement: We believe in the power of community and the importance of nurturing an engaged and passionate user base. We therefore encourage all IGISG owners to network independently, to strengthen the IGISG community in their commitment to good and to participate in the actions of the IGISG initiative.

Participation: To ensure transparency and fairness, we ask the community and token holders for their opinion when making decisions about future development. Community feedback is also the key voice in the provision of new IGISG tokens and in determining the desired total market volume of a new IGISG token. Even if the total market volume of the new token has been determined together, we always give early supporters and community builders the opportunity to purchase the new tokens at a discount.

The opinion of the IGISG community is also taken into account when considering the extent to which IGISG tokens should be donated.

7. Partnerships and collaborations

The IGISG initiative seeks to partner with like-minded organizations, individuals, and movements to amplify the impact of our collective efforts. By joining forces, we can create a network of support and enable even greater positive change in the world.

8. Roadmap
